

## **I have an antivirus of a different vendor already installed on my computer. Can I install Kaspersky Anti-Virus for protection of personal desktops, workstations or file servers version 6.0 as well?**

*Concerning to:*

- Kaspersky Internet Security 6.0 MP1 (build 6.0.1.411)**
- Kaspersky Internet Security 7.0**

During the installation **Kaspersky Anti-Virus** version **6.0** detects and deletes the following version products as concurrent functioning with these Anti-Viruses may slow down work of the user's computer or be incompatible with the Antivirus installed.

If you are installing the **File Anti-Virus** component, then **Kaspersky Internet Security 6.0 MP1** detects and allows automatically deleting the following products:

- Kaspersky Anti-Hacker 1.0-1.5
- Kaspersky Anti-Hacker 1.7-1.9
- Kaspersky Anti-Spam Personal 1.0
- Kaspersky Anti-Spam Personal 1.1-1.2
- Kaspersky Anti-Virus 4.x
