

## When installing the application there occurs a problem because of the missing libraries Microsoft Visual C++. How to rectify the problem?

*Concerning to:*

- **Kaspersky Internet Security 6.0 MP2**
- **Kaspersky Internet Security 7.0**
- **Kaspersky Anti-Virus 6.0 for Windows Workstations MP2**
- **Kaspersky Anti-Virus 6.0 for Windows Servers MP2**

Sometimes when installing the application **Kaspersky Internet Security 6.0**, you may get a message informing that to proceed with the installation it is necessary to download and install libraries **Micorsoft Visual C++**, which are missing on your computer.

To install the missing libraries, download and install the utility [MSVCP.6.0.8972.0.exe](#).
